

Making the Dream Come True

General Information & Price List

JDT MINI-MAX, LLC (Formerly Ison-Team Aircraft)

We are one of the newest, and oldest kit design and manufacturing organizations in the U.S.A.

Our light aircraft experience goes back to the early 1970's when Wayne Ison designed and sold kits for a small aircraft called the P.D.Q. This was actually an ultralight ahead of its time, and was licensed in the Experimental category. Originally powered by a two-cycle engine, it weighed only 220 lbs.

Among many of Wayne's designs were aircraft such as the FP-202, the first of the "Cub" style ultralights. This was followed by the FP-303, a folding wing aircraft with lines of a "military trainer." Building on these early successes, ISON Aircraft was formed to market kit airframes in the \$4,000.00 range. Through the efforts of a team of talented individuals such designs are being engineered, built and tested.

Our method is to use the latest computer design technology and FAR regulations to develop a **TRUE AIRCRAFT** which also qualify as **FAR-103 legal ultralights** by use of lower HP engines.

Current Price List & Model Description

AIRFRAME KITS

1030R MAX 103 Ultralight

MAX 103 ULTRALIGHT Model No. 1030F (Hirth F-33 Engine)

FAR 103 Legal Ultralight, open cockpit with swing over canopy.
Great looks and performance with the Hirth F-33 engine.
Wheel pants are optional. **\$ 4,835.00**

1100R Mini-MAX

BASIC MINI-MAX Model No. 1100R (Hirth F-33 Engine)

Original "open cockpit" Mini-Max. Construction time approximately 300 hours. Can be upgraded later to Models 1500R or 1600R. Legal ultralight with the Hirth F-33 engine. **\$ 4,295.00**

1500R Open Cockpit

OPEN COCKPIT MINI-MAX Model No. 1500R

Rotax powered model that meets requirements for Experimental or Microlight. Wheel pants are optional. **\$ 4,835.00**

1550 V-MAX Sportplane

**OPEN COCKPIT V-MAX Model No. 1550
4-Stroke, 4 Cylinder Opposed Engine**

Open cockpit, mid-wing light sportplane for Experimental or Microlight. Smooth four stroke power and reliability. Wheel pants are optional. **\$ 5,275.00**

1600R Enclosed Cockpit

ENCLOSED COCKPIT MINI-MAX Model No. 1600R

Rotax powered model that meets requirements for Experimental or Microlight. Wheel pants are optional. **\$ 5,115.00**

**QUICK Removable Wings
are standard on all models.**

Current Price List & Model Description (Continued)

AIRFRAME KITS

ENCLOSED COCKPIT EROS Model No. 1650R

Accepts dual carb, dual ignition Rotax 503, 50 HP engine. For Experimental or Microlight. Wheel pants are optional. **\$ 5,595.00**

1650R Enclosed Cockpit Eros

HI-WING HI-MAX Model No. 1700R

Rotax powered model that meets requirements for Experimental or Microlight. Wheel pants are optional. **\$ 5,265.00**

1700R Hi-MAX
Side windows optional on Hi-MAX

AIRFRAME KITS-- (What you will receive)

All wood and plywood cut to basic width and thickness. All metal materials. Any difficult formed parts are pre-fabricated. Welding is done at the Factory. Lexan windshield, pre-cut. Molded fiberglass cowl and headrest. All hardware is supplied to AN aircraft standards. Wheels and tires included. Pre-fabricated tail wheels. Dacron aircraft grade fabric covering, with fabric cement and drain grommets. Epoxy glue for wood structures. Custom molded 5 gallon gas tank. Handy AN bolt guage to check bolt size and length. Seat Belt and Shoulder Harness. Plans, Builder's Manual, and Flight Manual included.

MINI-AIRFRAME KITS--

Available in 7 kits.....starting with the rib kit through the fabric kit. See separate price sheet for complete details.

While the cost of building with Mini-kits is slightly higher than that of the complete airframe kits, spreading the cost over a longer period of time is considered worthwhile by many builders. Mini-Kits are available for all models, and may be purchased in any order.
